MEMORANDUM FOR: Office of Planning, Programming
and Budgeting, O/DCI

SUBJECT : Support of NPIC's Request for Additional
Photo Science Personnel

1. The Office of Special Projects/DD/S&T has become aware of NPIC/TSSG's recent request for additional photo science personnel in support of the [] program, and we wish to fully support that request.

2. We have been most pleased by the support NPIC's breakdown team has provided at the processing sites. This response to our need for rapid photo quality evaluation and photo system performance data has been most timely and useful. It is fully anticipated that this same type of support will be provided by NPIC []

3. OSP fully realizes that the advent [] will significantly increase the workload of the breakdown team and that additional people will be required to staff the workload generated by the expanded volume of film footage involved. Further, however, there are additional reasons for increasing the TSSG photo science staff. We are planning on conducting a Post-Flight Engineering Performance Analysis at Bridgehead instead of at NPIC, as has been the case with the [] program in the past. In this activity we will require support from TSSG personnel, at the processing site, that normally would have been needed only at NPIC. In addition, we anticipate that, as with any new program, many studies by TSSG, in support of our evaluation of camera performance, will be required. The extent of these studies shall be considerably above those currently required in support of []

4. Considering all aspects of the support that will be required by NPIC/TSSG/APSD to the [] activities, we fully support the request for additional personnel.
